INVENTOR'S LOG

INVENTION NAME:

PROBLEM SOLVED
BY THIS INVENTION:

N. _____
A. _____
C. _____
S. _____
P. _____

imagination in play

Print as two double-sided sheets and fold

INVENTION IDEAS

List your invention ideas and include dates you wrote the ideas. It is very important to sign your name and date each idea and have your parent, teacher, or guardian also sign and date the ideas. This will provide a witness to prove YOU had the idea before another person, if there is a question WHO had the idea first.

SKETCHES

Draw your Invention, and any possible options you might consider that will improve your invention later. Indicate the date(s) of the sketches, and sign your name. Also have your parent, teacher, or guardian also sign and date the sketches to act as a witness.

(Use page 8 for additional sketch details, or alternative drawings.)

THINKING IT OVER

Think about how you made your invention. What new skills did you need to learn?

What changes did you make in your original plan?

Who helped you and what did they do?

Where did you find your materials?

What sources of information were helpful?

How did you test your invention?

STEPS

Be sure to write down everything you did and the date you did each thing. Sign your name anywhere you indicate a date.

STEPS

MATERIALS & EXPENSES

List all the materials you used in developing your invention. Tell how much each item cost. If you borrowed an item, write down where you got it and how. It is OK to use recycled parts.
