

**Robotics**: The MMS VEX Robotics Team headed for Kissimmee, Florida, for the Ultimate Robotics World Championship. Each day students participated in events and coalition-building strategies to enhance their standing. At the end of the first day of competition Mansfield's Ultimate Robot 902B was at the top of the leader board. After three days of competition, Mansfield's Ultimate Robotics Team placed 16th out of 104 teams. Team 902B ended up with a 6-3 record and was helped in their final match by alliance partner 902A. Our friends, Green Eggs Robotics from Massachusetts, won the high school division in a very exciting match. There is a lot of excitement for next year with a completely new game with new challenges.
