

Spring

Eastern Connecticut State University eagerly shares with MMS students the news of the quality and affordable education. Our students are the ‘successes’ of tomorrow. With guidance, they can begin to gather information to help them make an informed decision about where to go to college following their high school graduation. It is never too early for them to begin thinking of how to prepare for their college career; regardless of what institution they ultimately attend.

To help our students learn about their options and prepare for college at an early age, *Eastern* hosts a **College Knowledge Day** a day in the month of May. College Knowledge Day is designed to inspire students to dream of college and help them plan even while they are in elementary and middle school. The program consists of workshops geared toward students in grades 8 - 9. Students attend age-appropriate sessions about planning and preparing for college and career exploration. And, of course, we also plan for students have some fun while they are on Eastern’s campus!

MMS provides transportation and Eastern provides the lunch at no cost.

It is a wonderful opportunity to encourage students to dream and plan for their futures.
