20. If you had the most a's, answer this question. This means you are a visual learner. Visual learners: take numerous detailed notes; tend to sit in the front; are usually neat and clean; often close their eyes to visualize or remember something; find something to watch if they are bored; like to see what they are learning; benefit from illustrations and presentations that use color; are attracted to written or spoken language rich in imagery; prefer stimuli to be isolated from auditory and kinesthetic distraction; and find passive surroundings ideal. How is this true for you?

Total responses: 37 (0%)

21. If you had the most b's, answer this question. This means you are an auditory learner. Auditory learners: sit where they can hear but needn't pay attention to what is happening in front; may not coordinate colors or clothes, but can explain why they are wearing what they are wearing and why; hum or talk to themselves or others when bored; acquire knowledge by reading aloud; and remember by verbalizing lessons to themselves (if they don't they have difficulty reading maps or diagrams or handling conceptual assignments like mathematics). How is this true for you?

Total responses: 33 (0%)

22. If you had the most c's, answer this question. This means you are a kinesthetic learner. Kinesthetic learners need to be active and take frequent breaks; speak with their hands and with gestures; remember what was done, but have difficulty recalling what was said or seen; find reasons to tinker or move when bored; rely on what they can directly experience or perform; activities such as cooking, construction, engineering and art help them perceive and learn; enjoy field trips and tasks that involve manipulating materials; sit near the door or someplace else where they can easily get up and move around; are uncomfortable in classrooms where they lack opportunities for hands-on experience; and communicate by touching and appreciate physically expressed encouragement, such as a pat on the back. How is this true for you?
