

TOWN OF MANSFIELD
DEPARTMENT OF PUBLIC WORKS

Engineering Division

AUDREY P. BECK BUILDING
FOUR SOUTH EAGLEVILLE ROAD
MANSFIELD, CT 06268-2599

From: John Carrington, P.E., Public Works Director
To: Town of Mansfield Residents
Date: July 14, 2015
Re: **Pavement Management Study**

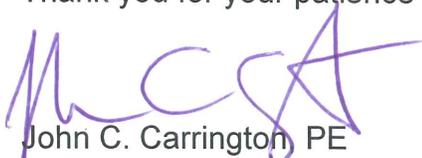

The Town of Mansfield (Town) maintains nearly 110 miles of roadways within its network making it one of the most expensive pieces of infrastructure the Town owns. This work is being undertaken by the Town to develop an inventory of all roadways and their associated condition. This study will be used to assist the Public Works Department in prioritizing maintenance, rehabilitation, and replacement to provide the best value to the Town's Residents.

Beginning the week of July 20, 2015, the Town's Consultant AMEC Foster Wheeler will be conducting pavement condition assessments throughout the Town of Mansfield. Field work will be conducted by two person crews dressed in lime green vests and will be driving a white pickup truck with the AMEC Foster Wheeler logo (see at right).

Please be aware of their presence on the roadway and do not hesitate to contact the Town of Mansfield Public Works Department at (860) 429-3331 or e-mail us at PublicWorks@mansfieldct.org.

Thank you for your patience and support,

John C. Carrington, PE
Public Works Director
