

**TOWN OF MANSFIELD  
CAPITAL IMPROVEMENTS PROGRAM NARRATIVE  
FY 2011/12**

*-Excerpts-*

**Replacement of Ambulance 507 - \$210,000**

This appropriation will fund the replacement of Ambulance 607, a 2003 International 4400 ambulance with 148,000 miles. Replacement is consistent with the department's effort to maintain its capability to respond with vehicles of this type. Replacement at this time will ensure that the department has a more reliable second line ambulance and is able to provide an ambulance response to multiple calls for service through the EMS Duty Crew program staffed by volunteers.

**Large Dump Truck - \$150,000**

This appropriation will provide funds to replace one of the Town's eight front-line dump/plow trucks, a 1998 International with 96,000 miles on it.

**Small Dump Trucks and Sanders - \$45,000**

This appropriation would provide funds to replace one of the Town's small dump trucks, either a 1995 International with approximately 90,000 miles on it or a 1999 Ford F450 with approximately 90,000 miles on it. Small dumps are used both to plow snow in the winter and for light hauling during the rest of the year in both roads and grounds maintenance.
