

Terms Used in Mansfield LOI

- “Existing Infrastructure” is the Existing Town water distribution infrastructure set forth in “Schedule A” of the LOI
- “UCONN System” is the existing University of Connecticut water distribution infrastructure
- “EIE” is the *Environmental Impact Evaluation for University of Connecticut Additional Source(s) of Water Supply, Project No. 901662*.
- “EIE Infrastructure” in the new water supply infrastructure contemplated by the EIE which consists of:
 - *Town Connection* - the infrastructure necessary to distribute potable water, subject to routing decisions, to meet immediate public health and redevelopment needs of the Town of Mansfield.
 - *Western System Improvements* – Source of supply enhancements anticipated by CWC’s Water Supply Plan, as revised to reflect the projected demands for the Town of Mansfield and UCONN, as appropriate.
- “Existing Customer” is any existing billed customer of record served by the University as of the Completion Date. They would be charged at that time at a rate equal to the water commodity charge and basic service charge then charged to those Existing Customers by the University for the applicable customer class
- “New Customer” is any new billed customer of record and any customer requesting an initial service connection made after the Completion Date. They would be charged at a rate equal to the water commodity charge and basic service charge for similarly defined CWC customers
- “Completion Date” is the date upon which CWC serves the Town written notice of completion of construction and testing of the EIE Infrastructure
- “Rules and Regulations” are the rules and regulations for all CWC customers, as approved and may be amended subject to PURA approval, that provide information for customers including but not limited to the general rules; applications and transfers of service; rules for meters, services, equipment, as well as details regarding billing, collection and denial or termination of service. The current Rules and Regulations will be included as an exhibit in the Definitive Agreement
- “Water System Advisory Committee” is the committee to be established comprised of representatives of the Town, UCONN, regional representatives and other key stakeholders that would advise regarding Water service and the System’s operation, expansion or integration.

- “Definitive Agreement” is the final contract language that will be developed by the parties, subject to approval of the Town Council, with the details to execute the provisions of the LOI.
- “DPH” is the state Department of Public Health
- “PURA” is the Public Utilities Regulatory Authority
- “DEEP” is the Department of Energy and Environmental Protection
- “Main Extension Agreement” as approved by PURA, that stipulates the construction standards and financial terms and conditions for any customer funded main extensions, a copy of which shall be included as an exhibit in the Definitive Agreement.
