THE INSTRUCTORS

Nancy Cooke Bunnell is a certified art teacher with over 30 years experience. Nancy has 25 years experience teaching in public schools and a combined 8 years teaching through the Community School of the Arts and Mansfield Community Center, among others. She currently teaches the regularly offered Youth Art Classes through Mansfield Parks and Recreation. She is also an award winning painter and pastel artist.

Reagen O'Reigaekn's programs are specific to curriculum guidelines and she specializes in combining hands-on tactile fun that develops motor skills with lessons that introduce contemporary and historical artists/art movements. She can often be found telling imaginative stories, wearing costumes, singing or dancing in the classroom. She incorporates phonics, counting, science and geography into her teaching wherever possible and finds teaching to be extremely rewarding.

Mini-Masterpiece Studio – Nature and Abstraction

(Entering grade 1 – age 14)

Draw, paint, and be a sculptor! This week of hands on art-making will let campers express themselves in daily artistic exercises and learn about the lives and works of famous artists who used nature as their inspiration. Explore Christo and Jean Claude's Land Art, Georgia O'Keefes Flowers, Joan Miro's Biomorphic Shapes, Richard Long's Mud Paintings, and more! Make a mini-masterpiece each day! Please dress for a mess! Instructor: Reagen O'Reigaekn

Dates: Mon.-Fri., June 27-July 1

Time: (152200-A) 9 a.m.-4 p.m.

Fee: \$189 for residents \$199 for non-residents

Materials Fee: \$30 materials fee due at registration.

Joy of Printmaking: Silkscreen

(Entering grade 1 to age 14)

Develop your own drawing, turn it into a silkscreen and print your artwork onto fabric and paper! Campers will create a frame-able work of art in the style of famous artist Andy Warhol, and print their design onto a t-shirt, canvas tote, make sketchbooks and notecards, and make an edition of prints to exchange with classmates. Campers will also be introduced to other fun printmaking techniques like printing with yarn and jello. These fun and easy techniques can be used over and over at home after the class ends. Dress for a mess! Instructor: Reagen O'Reigaekn

Dates: Mon.-Fri., July 11-15

Time: (152205-A) 1:00 p.m.-4:00 p.m.

Fee: \$143 for residents \$153 for non-residents

Materials Fee: \$25 materials fee due at registration.

Art From Around the World!

(Entering grade 1 – age 14)

Learn about the traditional arts and crafts of different cultures. A week of hands on art making lets campers express themselves creatively while learning new art processes, geography and about other cultures. Campers will paint, draw, stitch, weave and glue as they make Creek Story Vases, Aboriginal Dot Paintings, Cave paints, Quilted Molasses, Sand Mandalas, and more! Each day will include a short art history lesson, project time, nature time, play time, and art exercises or engineering challenges. Please dress for a mess.

Instructor: Reagen O'Reigaekn

Dates: Mon.-Fri., July 25-29

Time: (152201-A) 1:00p.m.-5:00 p.m.

AWESOME ACTIVITY WEEKS - SUMMER 2016

Brixology

New Mad Science program with LEGO™ Bricks

Brixology Camp sets the foundation for our next generation of makers! Kids learn about different types of engineering and then team up to construct a different engineering-themed project using LEGO™ bricks. They learn about aerospace engineering while assembling a space station. They explore mechanical engineering as they build boats and vehicles. That's not all, from carnival rides to drawing machines, mechanical animals to truss bridges, your future engineer will build upon their creativity to solve real-world design challenges, while developing their problem-solving and team-building skills. Let the tinkering begin!

ANATOMY ACADEMY

In this weeklong camp, children will have fun while learning about the scientific equipment they already own—the human body. Kids will explore the science behind cells, organs, muscles and bones through fun, hands-on activities. Campers will use micro-slide viewers to see some of the tiny cellular machines that keep our bodies working and will play the "Cell game" to learn about the "stuff" inside cells. Fun experiments will help campers understand more about their senses, brains, breathing, circulation and digestion. Children may create model cells, make Mad Mucus and a simulated stomach, build simple lung models, assemble a model skeleton, and much more.

E² - Engineering Explorers

Whether your child loves to build things or destroy them, this week of camp includes lots of both! The junior Mad Science engineers will design and build bridges and "skyscrapers" using simple tools and their imaginations. Kids will even construct a geodesic dome big enough for all the campers to sit inside! Then the machine madness starts as they discover how many different machines, simple & complex, we use in our daily lives. Campers will have fun designing simple machines using pulleys, wedges, screws and levers. Then we move on to engineering in action – your kids work together to brainstorm, design, test, evaluate and redesign problem-solving contraptions!

SECRET AGENT LAB

Develop your special agent and detective skill in this super hands-on week of fun! Uncover the science involved in evidence gathering and analysis. Sharpen your secret agent skills and discover how chemistry and the science of forensics can come to the aid of a secret agent. Identify and collect evidence – from fingerprints to tracks to trash! Secret agents-in-training will use science and awesome technological tools to connect the dots and help sniff out the suspects in this investigation into the science of sleuthing.

Other programs that may be available in surrounding areas include:

E² - Engineering explorers, Survival, Anatomy Academy, Brixology, Secret Agent, Crazy Chemworks, Space & Beyond, Rockin' Rockets, Red Hot Robots

Crazy Chemworks

We'll learn about the tools scientists use in their laboratories – atoms, molecules, and reactions; acids and bases; and fluorescence and phosphorescence. We'll also examine and investigate super sticky things by exploring suction, hydrogen bonding, and static cling and see some very cool dry ice demonstrations! The best part is that each day we'll be able to continue the science fun at home with our very own labware take-homes!

Give your child the best
BIRTHDAY PARTY EVER!

Sparking Imaginative Learning

Dream it. Build it. Wreck it. Repeat.

Kids are already naturally gifted creators. Then they get added inspiration from our specially trained instructors. They dive into our massive collections of LEGO®. And while they build elaborate objects, structures and vehicles, they explore fundamental principles of engineering and physics. They also learn to collaborate and create without fear of mistakes. The experience is joyful, the impact long-lasting.
