

Senior Center Roof

In May of 2010 the Town Council and subsequently the Department of Economic and Community Development approved the request to utilize housing rehabilitation revolving loan monies to fund a roof replacement at the Senior Center. A bid went out and was awarded to the low bidder. The work began June 21, 2010 and was completed by the end of that week. In addition to stripping and re-roofing, we were able to have new gutters and down spouts installed, and soffit and fascia board work repaired. Happily the Senior Center exterior is now in tip-top condition!
