

Name: \_\_\_\_\_

Living Things Vocabulary Review Assignment:

Choose six of the following terms to use.

For each term, write a complete sentence using the term in a way that demonstrates the meaning of the term. You may type your sentences, or write them neatly on lined paper. If you do not have your yellow glossary sheets, you may use the glossary sheets from my homepage or homework page.

This assignment is due on Friday, 12/13

Term			
adaptation	contractile vacuole	homeostasis	responding variable
algae	controlled experiment	homologous structures	scientific theory
antibiotic	cytoplasm	hypothesis	selectively permeable
archaea	decomposer	manipulated variable	species
autotroph	development	multicellular	taxonomic key
bacteria	diffusion	mutation	taxonomy
binomial nomenclature	eukaryote	natural selection	trait
cell	fermentation	nucleus	unicellular
cell membrane	flagellum	organelle	vaccine
cell theory	fossil record	osmosis	vacuole
chlorophyll	gene	prokaryote	variable
chloroplast	genus	protein	variation
chromosome	heredity	reproduce	virus
cilia	heterotroph	respiration	yeast
classification
