

Planet Symbol Design Extra Credit

Planets were usually named after Greek or Roman gods or goddesses. Modern day astronomers use numbers to name new stars and planets. Your task is to design a new symbol and name for one of the planets. Be creative and show that you know the characteristics of that planet.

You need to include:

1. rationale for choosing the new name
2. drawing of the new symbol (in color)
3. drawing of the person, hero, character or object the planet is named after (in color)

Drawing of symbol and image must fit in the box below.
