

## Simple Machine Comic Strip Assignment

Due March 9, 2012

In class, we have been studying the family of simple machines that are inclined planes. These include an **inclined plane, screw and wedge**. You are to choose one of those simple machines around which to create a comic strip. Your comic strip should show how the machine helps make work easier. Use vocabulary such as: **effort force, output force, mechanical advantage, efficiency, friction, and distance** to describe how your machine works.

### Requirements:

- At least 3 pictures or sections
- In color
- Hand drawn
- Clear explanation of how machine works
- Correct scientific vocabulary
- Creative
- Clever or funny
