

Friday  
Sept. 5

- I. READ in your textbook pp. 10 - 17 (Stage 1). This will give you some background information about Caecilius and his wife Metella. It also describes a typical house of a wealthy Roman citizen in the first century. N.B. the pictures of the mosaic floors and the fresco walls. (On page 17, there is no window in the room. It is an illusion of the wall painting!)
- II. Choose the answer that correctly completes each of the following sentences.
- Pompeii is located \_\_\_\_\_ of Rome.
    - north
    - southeast
    - east
    - west
  - During Roman times, a person with three names was
    - a slave
    - a wealthy woman
    - a Roman citizen
    - a politician
  - The most important part of the house was
    - the culina
    - the triclinium
    - the atrium
    - the janua
  - The roof of the atrium sloped downward to an opening
    - for artistic architectural lines
    - to allow for rain drainage and for light
    - to permit the use of support arches and columns
    - to allow the children an indoor shower when it rained
  - The main rooms used by the family were arranged around
    - the atrium
    - the tablinum
    - the culina
    - the cubiculum
  - The second part of the house, reached by going through the tablinum was
    - the lararium
    - the latrina
    - the perstylium
    - the impluvium
  - People of Pompeii who had homes like that of Caecilius were
    - shopkeepers
    - servants
    - wealthy
    - most of the population

OVER-----

8. The walls of the atrium were decorated with paintings of Greek myths which had been done in wet plaster; this technique of painting is called
