Benefits of working with RnB Enterprises:

After reviewing your facility during the initial pre-bid walkthrough and the released Q&As from the addenda, we want to mention the below points of discussion and review with you if we are selected for this project.

1. **Critical Timeline to meet project deadline** - Any deviation from the below timelines would impact our ability to meet the overall project deadline of **July 31, 2026**.
 - Immediately following the bid award by **February 16, 2026**, we will need final approval of custom color strike offs.
 - RnB's discovery visit will need to be completed by **March 1, 2026**. This includes an on-site tech visit to the specified location from our licensed techs/installers during the lunch hour to view the space and get an acoustical baseline rating prior to project start. This will allow for post installation acoustical evaluation
 - Following custom color strike offs, Turf submittal drawings take approx. 18-20 business days to turnaround. Once submittals are approved, production lead time is 6 weeks. RnB will require a PO and/or notice to proceed by **March 1, 2026** in order to adhere to the contract timeline.
 - During the install dates of **June 18 - July 31, 2026**, RnB will need full access to the space for a minimum of 8 hours per day Monday through Friday, excluding the July 4th holiday (July 3rd).

- Any days that we cannot access the site or cannot access the site for the full 8 hours, will be considered a day lost that will need to be added to the deadline in order for the work to be completed.
 - Any delays due to the school or other vendors for system integration, installation, testing or clean up, will not be held against RnB for timeline completion.
2. **Air Diffusor:** No extra column is needed as current wall panel specs state 2 1/8" inch thickness which matches the replacement wall panel, as such this is not included in our scope of work.
 3. **Team Coordination:** The school will support coordination of the district team if fire alarms, exit signs, etc. will need to be disconnected and reconnected to ensure proper functioning of the systems.

Request for Substitution

Mansfield Elementary School Acoustic Improvement Project
January 2026

Re: Addendum #2

The originally specified material was substituted with Turf Baffles and Wall Panels based on RnB Enterprises Inc's prior experience with this product in similar applications. Through previous projects, this material has consistently demonstrated reliable performance, durability, and compliance with applicable standards. Refer to documentation provided from Turf Company as it does meet the spec requirements for the Mansfield Cafeteria Acoustic Improvement Bid. Its use is well understood by the installation team, which helps ensure proper installation and quality control. The substituted material meets or exceeds the performance and functional requirements of the originally specified product and does not alter the design intent, quality, or longevity of the project.

This is RnB Enterprises, Inc's formal and fully documented replacement request for Turf to replace Pinta Acoustics Baffles and Sound Seal Wall Panels.

Sincerely,

Courtney Schwartz

Timber

Quiet by nature

Quiet wooded areas, captured in acoustics. Timber's clean construction lends itself to complex or simple sculptural forms while digital wood grains nod to nature. Wherever this tree falls, no one will hear its sound.

Recommended Connections

FeltLock

Products with Turf’s patented FeltLock flex and compress to insert into Unistrut.

P1000T Unistrut, raw galvanized finish or powder-coated, hardware is required.

Painted unistrut may damage FeltLock installations and will void the product warranty.

Cable To Deck

Baffles with embedded cable grippers snap into deck-mounted aircraft cables.

10’ aircraft cable supplied by Turf should be trimmed in the field as needed.

GridLock

The GridLock attachment flexes to grasp the tee grid. GridLock is incompatible with ACT tiles.

9/16” or 15/16” flat tee grid is required.

Please note, the maximum spacing for GridLock connection is 24” OC.

Layout Considerations

- Wall Clearance

Turf recommends a 4" clearance from the wall to our baffles.
- Adjacent Baffle Clearance

Turf recommends a 1" gap between all rows of baffles. This clearance supports a uniform look and build.
- Trim in Field

Timber Baffle cannot be trimmed in field, trimming would reveal seam and base felt color.

9mm Colors

Introducing Hues, our new 9mm color palette designed for the senses.

The 9mm PET felt board is used as our primary construction material. Select one of our coordinating neutrals to blend in, or go for a contrasting element with one of our hues.

The process used to create PET felt often results in a heathered effect where multiple tones are present. Slight variations in color should be expected when using this sustainable material.

Subject: Proposal for Bidding and Construction Administration Support Services
Mansfield Elementary School Cafeteria Acoustics Study
Mansfield, CT
Proposal Number 638995.04

Dear Amanda:

We understand that the Town of Mansfield has decided to move forward with implementation of the acoustic remediation scope for the elementary school cafeteria which Acentech designed following our study of the space. We would be pleased to continue our assistance with the project through the bidding and construction administration phases by providing technical support on an hourly, as needed/on call basis.

During the bidding phase, we will be available to respond to acoustics-related questions, requests for information, and other support as necessary.

During the construction administration phase, we will be available to respond to acoustics-related RFIs, submittals, substitution requests, and other clarifying questions. We will also be available to visit the project site one time during the construction process to observe the progress and comment on acoustical items. Following our site visit, we will prepare a memo to be distributed to the construction team describing the open items we saw and recommendations for changes as necessary.

As noted above, we propose to provide these services on an hourly, time and materials basis. Our total fees will not exceed \$2000 for the bidding phase and \$4000 for the construction phase without prior authorization. Acentech's billing rates for 2026 are attached; my billing rate will be \$225/hour. If additional scope (such as additional site visits, or review of non-acoustical aspects of design or construction) is deemed necessary, this will need to be authorized separately.

We present this proposal based on our understanding of the project's scope and needs. Please contact me with any questions at aroehl@acentech.com or 617-499-8026. We look forward to continuing our work with you and the Town of Mansfield.

Sincerely,

Alexander Roehl

Hello Randy/Ryan,

Putting a portion of the attached before you for potential expedited approval ahead of the next committee meeting.

As discussed at the last SBC meeting: the committee was amenable to considering bid and construction phase acoustic consulting services from Acentech. While construction administration can be reviewed at the next meeting, bid phase services might be needed before the next meeting in order to help evaluate any potential bid responses. Those bid responses are scheduled to be reviewed

and potentially reviewed at the next meeting. The bid phase services I would suspect might be prudent are any substitution requests from bidders for panel materials Colliers does not have the technical expertise to evaluate.

The allowance proposed is \$2000 billed on an hourly basis. No fees would be expended unless Acentech is engaged with a question or similar.

If you approve, please respond back so I can coordinate with Town Finance. Please reach out with any questions.

Thank you!
