

Winter Tracking Program

Instructors: Sue and Tom Harrington
Location: MCC Community Room
Date: Sun., Jan 16th
Time: (311001-A) 1:00 pm
Fee: FREE

Learn the age old skill of identifying animal tracks and learn a little about how animals walk and how this relates to their track patterns. We will start with some fun activities inside the Community Center then head outside to see if we can find any tracks. Dress warmly and wear boots suitable for walking in the snow (if there is any!). Masks are required while we are inside.
